DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,4-7 & 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Elfving et al (4,055,053) in view of Newton (3,192,726). Elfving discloses a thermoelectric water cooler or ice freezer comprising: a plurality of semiconductor bodies (12) consisting of P-type & N-Type thermoelectric devices for absorbing and dissipating heat, a metal water tank (130), a water feed line for supplying water, a conveyor connected to tank consisting of crank (137) and driving gear pulleys for driving conveyor (see figure 8). Elfving lacks an inverted water tank thereby situated above the heat absorbing and heat dissipating devices. Newtown teaches a water tank Inverted and situated above said semiconductor bodies. It would have been obvious to one having ordinary skill in the art at the time the invention was made to improved the disclosed invention of Elfving with an inverted tank situated above a plurality of cooling devices as taught by Newtown for more efficiently freezing of ice. ***Allowable Subject***

Matter

Claims 15 –28 are allowed over the prior art of record.

Claims 3 and 8-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
